## ACADEMIC SESSION 2022-23 SAVE SOIL INITIATIVE

Cir no.01/Acad/I-IX/2022-23

15<sup>th</sup> April 2022

*Be a solution to the soil pollution...*

Dear Parents,

Greetings of happiness to you all !

We are eagerly waiting for our students to be on the campus from the month of June. As a very happy school initiative , we plan to have for students to write letter to the Prime Minister , Shri Narendra Modi ji, to support the mission to save soil of India as an Earth Day Initiative this year. We plead him to save the precious soil of our Motherland.This activity shall be conducted on Saturday, 16<sup>th</sup> April 2022. We propose to have this letter reach the PM's office on or before Friday, 22<sup>nd</sup> April which is celebrated as "Earth Day"...

As per the research findings it is predicted that if we don't make conscious efforts to save the soil ,by monitoring and controlling the landfill.....the soil shall no longer be cultivated. We have majorly contributed to exploiting resources and we would fail in our duties if we don't now, create awareness among our children driving home seriousness of this issue.

Students are expected to write a letter on a customised letter template in PDF format that will be shared by the class teachers on the WhatsApp groups. The students should complete it and parents are requested to submit the letter in an envelop to Ms. Rajani by visiting the campus. Students interested to collect the hard copy of the template can collect on 16<sup>th</sup> April 2022 from Ms. Rajani.

Please help us orient the content of the letter which could also have your thoughts and ideas.....

It could actually start with..... "My daddy says....or My mummy feels....

Our Chairman Dr. DK Bhosale, our President Dr. Vrishali Bhosale and Directors Ms. Devyani Bhosale and Ms.Rutuja Bhosale join me in conveying their greetings to you all...Jai Hind ....Jai Maharashtra

Warm regards

Jayshree Venkatraman

Academic Director
